# FEEDING

# 6

## FEEDING INUKSHUK TO YOUR PACK

Inukshuk's nutrient-rich formulas are designed to deliver more with less.

### FEED LESS, FUEL MORE

Whether you're feeding a working dog, a sport dog, or a companion animal, Inukshuk makes it simple to adjust portions as their energy needs change.

- Smaller portions with big results
- Better absorption = less cleanup
- More value per bag

### FOR BREEDERS & PUPPIES

- Puppies: Start with 26/16 or Marine 26/16 at weaning for steady, healthy development.
- Lactating Females: Increase calories with 30/25, or free-feed 26/16 to support energy demands.
- Growth Phase: Adjust portions and formulas based on activity level and body condition.

### CHOOSING THE RIGHT FORMULA

Not sure which formula fits your dog?

All Inukshuk formulas share the same high-quality core ingredients, making it easy to transition between them as needed.

# THE INUKSHUK<sup>7</sup> EDGE

---

## **VACUUM INFUSION TECHNOLOGY**

Healthy fats are an important component of a dog's diet. During our infusion process, air is pulled out of the production chamber, allowing healthy oils to permeate the kibble, providing clean, dry, and nutritious food.

## **FINE GRIND PROCESS**

We use a specialized hammer mill that grinds ingredients to the consistency of flour. Fine grind means denser pellets, less bag dust, better oral health, and better nutrient absorption.

## **ONE-WAY VALVE BAGS**

Our one-way valve reduces oxidization and keeps food fresh. Fresher food delivers healthy fats and vitamins with more potency and flavor.
